New Option to Immediately Transmit Deere Parts Orders

Included with R6V07 service pack F (released 03/22/2010), is a new option for John Deere dealers that allows parts purchase orders to be immediately transmitted to Deere. This new PFW IntelliDealer transfer option represents a significant improvement to the JD Point Pathways Parts Order Download interface, allowing orders to be transmitted in a much more seamless manner.

From the Parts Invoicing/Requisition system, after a user creates a separate order, the Parts Order Fax Parameters screen is presented which has a new 'Transmit' button at the bottom (Figure 1).

Figure 1

Clicking the 'Transmit' button will open up a new window where the details of the order can be entered (Figure 2).

Figure 2

After clicking 'Transmit', the Deere order# will be assigned and the order will immediately appear on JD Point as an "Un-submitted Order". From there, the user can complete the order. The same 'Transmit' button is also available from the 'Parts Ordering' system, which provides the ability to transmit group orders and stock orders.

NOTE: This new feature is available for PFW IntelliDealer users only. Dealers who are currently licensed for the JD Point Pathways Parts Order Download interface (Feature# 6104) will automatically benefit from the improved IntelliDealer Transmit capability. If you are not currently licensed for the JD Point Pathways Parts Order Download interface, and are interested in having this ability, please contact your sales representative for more information.

IMPORTANT NOTE REGARDING PFW'S UPCOMING RELEASE 7.0 (SPRING 2010)

In preparation for our next software release, we would like to inform dealers that you will be required to upgrade your IBM operating system to IBM's current release: IBM i 6.1 (formerly i5/OS V6R1).

Preparation is a must for a successful upgrade to V6R1. It is advisable to contact PFW Client Services prior to this upgrade to ensure that all steps have been completed and to answer any questions that you may have regarding this upgrade.

Additional information can be found at IBM's System i (iSeries) Upgrade Planning Website:

<http://www-947.ibm.com/systems/support/i/planning/upgrade>
