New in R6V02:

John Deere Marketing Service Times (MST) Interface

PFW has recently developed an interface for John Deere dealers that using the Marketing Service Times (MST) web application. MST allows dealers to choose which MSTs they wish to download, and then export them as an XML-formatted file which can be imported into the PFW system. The PFW interface receives the data through the John Deere DTF and loads the information into the PFW flat rate system. The following image is an example of an MST record viewed through the PFW IntelliDealer Job Code Details screen.
