January 2006

Effective in R6V04:

New Labor Pricing Feature

Effective with R6V04, you will have the option to price labor based on the customer number, type of work order, premium code, and start and end dates. This feature is similar to the Customer Discount feature within the Parts module.

In the first example (Fig. 1), the labor rate for all field repairs (repair type FC) for customer 0232406100 is to be 10% above the list labor rate when premium code 06 is used. The start and end dates indicate that this rate will apply only for the month of December, 2005.

In the second example (Fig. 2), the shop warranty (SW) rate for customer 0235186600 will be \$67.50 per hour and the default premium code will be 01. The system will default to the default premium code 01 when labor is posted to the work order through IntelliTech. This labor rate will be in effect from January 1, 2006 to June 30, 2006.

The Special Price check box indicates that this is the rate to be used if there is an overlap with another labor pricing record.

The labor pricing entries can be maintained in the Product Support Labor Pricing feature in IntelliDealer (Fig. 3).

For more information on this software feature and others, contact PFW Client Services at (519) 474-3700, or e-mail support@pfw.com.
