December 2007

New for R6V05

John Deere Parts Availability

We have recently added a "John Deere Availability" button to the Parts Availability screen that, when clicked, will display John Deere Parts Availability for the selected part. In this example, the Parts Availability window for part AR43634 displays.

When the user clicks on the John Deere Availability button, the user may first be asked to select a vendor and/or dealer number if there are multiple instances of each. Otherwise, John Deere Parts Availability data for that part appears in a pop-up window. The user can continue to stay in the window and select new parts numbers to display.

This feature saves the user from having to rekey the same part number into a separate browser for John Deere Parts Availability.

To install the John Deere Parts Availability interface, contact PFW Support at (519) 474-3700 or support@pfw.com.

John Deere Price Update Format

Recently, John Deere announced that all Dealers wanting to receive parts price updates through DTF must be using V2 of the Parts Download Center by February, 2008. All John Deere Dealers need to load R6V05 on their system as soon as possible in order to meet Deere's deadline. If not, Dealers will have to download monthly price updates from the Deere website or order the updates from PFW.

For more information on these software features or to order R6V05, contact PFW Client Services at (519) 474-3700, or e-mail support@pfw.com.

The image shows two screenshots of web browser windows. The top window is titled "Parts Availability - Windows Internet Explorer" and displays a table of parts availability for part number AR43634. The table includes columns for Location, Description, Price, On Hand, On Order, L12, SalesSource, Class, Inventory Stocking Code, Dia, and Return. The bottom window is titled "John Deere Availability - Windows Internet Explorer" and displays detailed information for part AR43634, including Part Information Summary, Package Summary, Inventory Locations, Replacements, and Notes. The "John Deere Availability" button in the top window is circled in red, and the "Part Number: AR43634" input field in the bottom window is also circled in red.

Location	Description	Price	On Hand	On Order	L12	SalesSource	Class	Inventory Stocking Code	Dia	Return
