

# "This system gets the job done."

Tom Taege  
Owner  
TNT Equipment

## For Tom Taege, solutions come quickly.

Tom doesn't like to see his customers waiting at the service counter. That's not good business — and certainly not good for his customers.

So, at TNT Equipment, there is no waiting around. That's because Tom and his team have instant answers and fast solutions.

"PFW really understands our need for efficiency in the service shop. With PFW we have the most sophisticated system for tracking labor and keeping

up-to-the-minute accounts — that means better, faster customer service."

PFW offers a totally integrated management system that allows you to record, analyze and access real-time information about your dealership — when you need it, where you need it.

From complete customer profiles to parts and service management to financial reports and beyond, PFW designs dealer solutions for dealer needs.
