- Anti-Phishing
- Web Filtering
- High Availability
- WAN Failover
- Network Management
- SoftPak Director Technology for Instantaneous Updates

PFW has been offering eSoft's firewall/VPN appliance, InstaGate, for more than five years.

InstaGate, today's threat management solution, is a reliable and versatile unit that provides secure internet connectivity; site-to-site VPN tunneling; a number of optional SoftPak software solutions that collectively provide the dealership a secure, protected internet connection; and security from the numerous threats that are a reality when connected to the internet today.

Due to the industry's standard hardware life cycle of an estimated four years, eSoft recently introduced a new generation of appliance models, the 404, 404e, 604, and 806, which offer the latest hardware and software platforms to provide the level of protection necessary for today's internet-connected dealership.

There are numerous firewall/VPN appliance choices in the marketplace. eSoft's offering provides a cost-effective and custom-tailored solution that yields maximum customer value and accommodates the level of protection sought by dealerships today.
